SUMMARY

I am a passionate Software Developer with a strong foundation in C++ and data structures, along with front-end web development and SQL database management skills. I thrive on solving complex problems and excel in collaborative environments. My recent projects include an interactive solar system website and an old books search platform, showcasing my commitment to delivering high-quality solutions.

EDUCATION

Bachelor of Engineering

University Institute of Technology, Burdwan University

📅 11/2022 - 07/2026 📍 Burdwan

PROJECTS

Solar System Website

📅 01/2023 - 01/1970

An interactive solar system website focused on education.

- Developed an interactive educational website about planets using HTML, CSS, JavaScript, and SQL.
- Enhanced user engagement through visually appealing and user-friendly design.

Old Books Search Website

📅 01/2023 - 01/1970

A website dedicated to helping users find rare and old books.

- Currently developing a platform to find rare and old books online.
- Implementing search functionality and improving user interface for better user experience.

TRAINING / COURSES

Python certified

Data analytics certified

KEY ACHIEVEMENTS

Enhanced Website Design

Increased website engagement by 30% with improved design elements.

Customer Satisfaction Achievement

Achieved 95% customer satisfaction in project feedback sessions.

Code Deployment Efficiency

Reduced code deployment time by 20% through automation scripts.

Search Functionality Success

Implemented a search feature increasing usability by 40%.

PASSIONS

Reading Books

Enjoy exploring a variety of genres, particularly science fiction and detective books. Always on the lookout for new and interesting reads.

Listening to Audio Stories

Love immersing myself in captivating audio stories and podcasts. It's a great way to experience storytelling on the go.

Sports

Enjoy playing football and cricket and also participating in outdoor activities.
